Annual Author Index

Following is the author index for volume 160 of the *Journal*, which covers all material from January 2003 through December 2003. The *Journal* no longer prints a subject index. Two-letter abbreviations are used for months. The complete citation for each article is listed under the name of the first author. Coauthors are listed alphabetically with a cross-reference to the first author; cross-references containing multiple first author names separated by semicolons indicate multiple articles by the coauthor. In addition to being indexed by author name, letters to the Editor regarding articles published in 2003 are indicated in parentheses after the citations for those articles: Editorial (editorial), Images in Neuroscience (image, neuro), Images in Psychiatry (image, psych), Clinical Case Conference (case conf), book review (bk rev), letter to the Editor (letter), and Official Actions (off acts). Corrections are cited with the articles to which they refer.
